

The 110th **EICMA** ended a few days ago, with an incredible record of 600,000 attendees spread over the six days.

For the 4th straight year, **Eurogrip** attended with its full range of tyres, ranging from the existing ones to upcoming novelties and also a sneak peak at prototypes for **Trailhound Wild** and **Bee Wild**.

It's a unique opportunity to showcase our products, team and brand as a whole; and although it's a considerable investment (unmatched by other tyre manufacturers), the reception we had made it absolutely worthwhile.

The three **Trailhounds** (**STR**, **SCR** and **WILD**) generated the strongest interest, closely followed by **Roadhound** and **Climber XC-R**.

Bee Connect and **Bee Wild** were the subject of several queries by retailers, and **Protorq Extreme** pitches linked to **Aprilia RS457** and **Tuono 457** were listened to eagerly.

In general, a idea of a brand with good products, cool designs and honest prices appealed to motorcycles riders from several countries.

Customer Gala Dinner

As part of the event, we also hosted an exclusive dinner to express our gratitude to some of our most valued partners and clients. It was a pleasure to present our latest developments in an intimate setting, while also celebrating outstanding achievements with the **Best Performances 2024 Awards**.

Thank you to all who attended – your support and dedication make our success possible.
