

Autopromotec 2025

We'll be at **Autopromotec** (May 21–24, Hall 20 – Booth C87), one of Europe's key B2B events for the automotive aftermarket. On display: our full two-wheeler range, including the new **Trailhound STR and SCR** for adventure and scrambler bikes. A great chance to connect with industry partners and showcase what's next.

International Events

This season, Eurogrip participated in a number of international events through the strong efforts of our local distributors. In this edition, we've selected three highlights:

- In the **Philippines**, our distributor represented the brand at **MakinaMoto 2025**, the country's top motorcycle show, generating great engagement from local riders and industry professionals.
- At **Moto Show 2025** in **Thessaloniki, Greece**, Eurogrip showcased its products alongside major motorcycle brands, attracting strong interest from visitors and reinforcing its positioning in the Southern European market.
- In **Taiwan**, the **Naughty Rider** track event provided a perfect stage for our **Ptorq Extreme** to impress local media and sport riders, including coverage from **SUPERMOTO8**.

These events confirm the strength of our international network and the growing recognition of the Eurogrip brand across diverse riding communities.

Aprilia Tuono 457 | First Feedback

The newly launched **Aprilia Tuono 457** features our **Ptorq Extreme** tyres as original equipment. Early reviews from top Italian journalists and moto influencers have been very positive, particularly highlighting grip and stability.

This OE fitment enhances our visibility among sport bike users and supports brand credibility in the European performance segment.

Hard Dragon with Sonny Goggia

We're proud to support **Hard Dragon 2025** (June 21–22), one of Italy's most challenging hard enduro events, held in the Apennines by **Sonny Goggia**, former **European Superenduro champion**, and the **Enduro in Appennino** team.

The event will be a great opportunity to showcase our new **Climber XC-R Supersoft** tyre to the public — a high-performance rear tyre developed for the toughest off-road conditions.
