FOR DISTRIBUTION IN EUROPE ONLY

EUROGRIP SELECTED AS TYRE SUPPLIER FOR THE NEW APRILIA RS 457

EUROGRIP will supply their high performance radial tyre PROTORQ EXTREME for the recently unveiled Aprilia RS 457, the newest member of the 660 family.

Aprilia's RS series represents the Italian brand's take on sportiness, perfectly matched by the Track & Road attitude of Protorq Extreme.

Protorq Extreme features a 0° steel belt, which ensures excellent handling of the bike at high speed, working alongside a finely tuned profile to enhance riding precision and rider feedback at all stages of leaning.

The combination of an advanced tri-polymer tread compound with high structure carbon and silica, creates an optimal balance between grip, warm-up quickness and durability. The tread design not only enhances the RS 457 sportiness but also offers optimal land-to-sea ratio to allow maximum surface of rubber on the ground even in the sharpest curves.

EUROGRIP has finely tuned Protorq Extreme alongside Aprilia's team during multiple proving sessions on Italian tracks and roads, until reaching the peak of performances worthy of the thrilling RS 457.
