‘RIDE INTO THE WILD’ WITH THE NEW EUROGRIP ADVENTURE TYRES

Attending **EICMA** for the 5th consecutive year, **EUROGRIP** will be showcasing **several new tyres** adding up to its already extensive range. The presence in EICMA is a crucial step in the strategy of the brand, who has participated in all editions since its debut on global market in 2021, enjoying a growing attention from dealers and riders alike.

Set to ignite the love of adventure for riders worldwide, **Trailhound Wild** and **Bee Wild** are tyres for mixed usage on Asphalt, stone paved surfaces, dirt and gravel roads. **Trailhound Wild** is dedicated to Medium and Big Enduro motorcycles, perfect for riders who let their wanderlust guide them off the beaten paths. **Bee Wild** has been developed for scooter owners who don't let rough roads set their limits, be it for commuting or travelling around.

Technological features for Trailhound Wild and Bee Wild include:

- Tread pattern with **optimal land/sea ratio** at all lean angles, ensuring traction even on cobblestones, slabs and dirty roads, with high water dispersal capability;
- **Knobs layout and shape** for enhanced durability both on and off asphalt;
- Balanced **silica & carbon black compound**, ensuring grip on wet tarmac, traction and mileage;
- High-quality **synthetic fibers structure**, with **0° steel belt** on radial sizes.

Both tyres, as well as the rest of **Eurogrip Global range**, were designed in Italy and underwent multiple rigorous testing sessions on road, off-road and on track, before the worldwide release scheduled for early 2026.

Apart from Bee Wild, two more scooter tyres will be part of the showcase - Bee Volt & Bee Sport. **Bee Volt is a low rolling resistance tyre developed for electric scooters**, with a launch range of 6 sizes for the most popular applications in the segment; **Bee Sport** caters to **adrenaline-seeking riders**, and is scheduled to hit retailers in the second half of 2026. It features a tread design inspired by the popular Protorq Extreme, along with engineering solutions to match its ambitions.

Thrill-seekers will have one more reason to visit the Eurogrip stand, as a **new prototype** will be unveiled in a couple of variants, with riders and dealers having the opportunity for a first look! Eurogrip stall will also host the rest of the Italian designed tyre range which covers multiple applications from Sport Touring to Off-Road, Trail Road, Classic & Scramblers, Sport and Scooters.

*“Four years after the first Eurogrip tyres landed in Europe, we now have a wide range of 150 different sizes, covering the majority of segments”, declared **Angela Batalan**, Eurogrip Sales Manager, “The continuous expansion of our distribution network, and OE partnerships that now includes prominent European brands, are a testament to the efforts we are pouring into commercializing high-performance tyres with a competitive price positioning”.*

EUROGRIP will welcome distributors, retailers and riders in **Hall 14, stand H38**.
