

THE TEST

350 km from Barcelona to Coll de Pal on a Suzuki V-Strom 800. A 'Winter Escape' trip from the Mediterranean coast of Catalunya to the 2,106m peaks of the Pyrenees, the tyre faced everything from warm coastal curves and rough, patched asphalt to light gravel and icy mountain passes covered in meltwater and snow residues.

KEY RESULTS

- ⇒ Instant Trust: Rapid warm-up and predictable, neutral handling from the very first mile.
- ⇒ Wet & Cold Grip: High-silica compound ensures safety on icy passes and meltwater.
- ⇒ Premium Comfort: Excellent self-damping and smooth rolling on rough, patched asphalt.
- ⇒ Road-Focused Versatility: A reliable all-rounder for long tours and light gravel detours.

KEY QUOTES

Trailhound STR feels like is designed to deliver a clean and predictable riding experience. [...] The tyre quickly conveys a sense of reliability without ever feeling intrusive.

Trailhound STR absorbs small bumps effectively and offers good damping characteristics, significantly improving comfort on poor road surfaces.

The riding experience is natural and intuitive: you work with the tyre, not against it. The result is a very solid overall feeling, especially appreciated on long days on the saddle and across varying surfaces.

The Trailhound STR shows its real strengths where most adventure bikes spend most of their time: on winding roads. [...] This is exactly where the tyre proves its capabilities. The harmonious turn-in, already noticeable early in the trip, remains its greatest strength even at a more spirited pace. The tyre leans in cleanly, holds its line with stability, and provides clear feedback from the contact patch.

The tyre performs confidently even in cold and wet conditions. It offers support, builds trust, and maintains a smooth and predictable turn-in. This clean and composed steering feel proved especially valuable at higher altitudes, where the road surface continuously suggests caution.

ABOUT TRAILHOUND STR

FOLLOW THE TRAIL AND MAKE IT YOUR OWN – A 90/10 road/trail tyre built for long-distance asphalt travel with the freedom to venture confidently onto gravel and dirt.

MAIN FEATURES:

- /// Radial structure with 0° steel belt – Ensures responsive handling and consistent control across speed ranges
- /// *Quadrazone* multicompound technology (on selected rear sizes) – Distinct compound zones for optimized grip, mileage and cornering stability
- /// High Silica Compound – Enhances traction and flexibility in cold or wet road conditions
- /// Adaptive tread design – Engineered for balanced on-road wear and confident traction on unpaved surfaces
- /// Profile and casing optimization – Improves rider feedback, line precision and overall comfort on varied terrain

SIZES

RIM	SIZE	WHEEL
17	120/90 – 17 64H TL	REAR
	130/80 – 17 65H TL	REAR
	130/80 R 17 65H TL	REAR
	140/80 R 17 69H TL	REAR
	150/70 R 17 69H TL	REAR
