

THE TEST

The InMoto editorial team tested the Eurogrip Trailhound STR tyres during a test day at the Vallengunga proving ground and surrounding roads, using a Honda Africa Twin 1100 Adventure Sports.

The test was carried out primarily on paved roads, with a few light off-road sections, to evaluate the tyre's real-world performance in a 90% road / 10% off-road adventure application.

Particular attention was given to steering precision, front-end feedback, cornering stability and the motorcycle's dynamic behaviour during on-road riding.

KEY RESULTS

- ⇒ The Trailhound STR delivers precise and progressive on-road handling, with smooth turn-in that enhances control and predictability.
- ⇒ The tyre structure provides composed cornering behaviour, limiting deformation under load while delivering a strong sense of stability and rider confidence.
- ⇒ The rounded front profile promotes natural lean-in characteristics, improving front-end feedback and steering precision throughout the corner.
- ⇒ Its road-oriented design prioritises riding comfort, control and stability while retaining the ability to tackle occasional light off-road sections.
- ⇒ Overall, the Trailhound STR confirms itself as an adventure tyre designed primarily for road use, ideal for riders covering long distances without giving up occasional detours onto unpaved roads.

KEY QUOTES

"The front tyre has a nicely rounded profile and guides the bike into the corner in a very progressive way."

"It really helps you feel what the front end is doing."

"In corners it behaves very precisely, with minimal deformation and a reassuring sense of stability."

"It leans into the corner smoothly and maintains excellent balance throughout the motorcycle."

"It's a tyre built for real road touring, the one you fit when you know you'll be covering long distances."

FOLLOW THE TRAIL AND MAKE IT YOUR OWN – A 90/10 road/trail tyre built for long-distance asphalt travel with the freedom to venture confidently onto gravel and dirt.

MAIN FEATURES:

- Radial structure with 0° steel belt – Ensures responsive handling and consistent control across speed ranges
- Quadrazone multicompound technology (on selected rear sizes) – Distinct compound zones for optimized grip, mileage and cornering stability
- High Silica Compound – Enhances traction and flexibility in cold or wet road conditions
- Adaptive tread design – Engineered for balanced on-road wear and confident traction on unpaved surfaces
- Profile and casing optimization – Improves rider feedback, line precision and overall comfort on varied terrain

Description and Sizes

SIZES

RIM	SIZE	WHEEL
17	120/90 - 17 64H TL	REAR
	130/80 - 17 65H TL	REAR
	130/80 R 17 65H TL	REAR
	140/80 R 17 69H TL	REAR
	150/70 R 17 69V TL	REAR
	170/60 R 17 72V TL	REAR
18	150/70 R 18 70V TL	REAR
19	100/90 - 19 57V TL	FRONT
	110/80 R 19 59V TL	FRONT
	120/70 R 19 60V TL	FRONT
21	90/90 - 21 54H TL	FRONT
	90/90 - 21 54V TL	FRONT
