

TEST

Moto.it tested the Eurogrip Bee Wild tyres in Sicily on a Honda ADV350, covering approximately 500 km across urban roads, motorways, winding secondary roads and compact dirt tracks.

The test included around 100 km of city riding as an initial phase, followed by motorway sections, mixed routes and light off-road terrain, with the aim of evaluating the tyre's performance in the main usage scenarios of a modern crossover scooter.

The focus was on the versatility of the Bee Wild, a tyre designed for 80% road and 20% off-road use, assessing its agility, comfort, grip, stability and behaviour on low-traction surfaces.

KEY RESULTS

- ⇒ The test highlighted a tyre particularly well suited to everyday use, capable of adapting naturally to both urban environments and weekend rides that include light off-road sections.
- ⇒ In the city, it stood out for its quick warm-up, its ability to absorb bumps and road imperfections, and the sense of confidence it provided during braking, even on uneven surfaces.
- ⇒ On paved roads, it helped make the ADV350 especially agile in direction changes while maintaining strong front-end grip and reassuring stability through corners.
- ⇒ On the motorway, it retained good directional stability despite its handling-focused character.
- ⇒ In light off-road conditions, it delivered predictable and controllable performance, allowing compact dirt roads and sandy sections to be tackled with confidence and ease.

QUOTES

"What I liked first and foremost was the great agility these tyres give the scooter, and that's something that shouldn't be underestimated."

"The tyre structure really helps the suspension work effectively, improving bump absorption and overall urban comfort."

"The scooter is incredibly agile when changing direction and once leaned over there's really impressive front-end grip."

"The key words are predictability, controllability and ease of riding."

"It's a tyre that can easily be your everyday travel companion, both in the city and on weekend rides out of town."

From city streets to light dirt roads, Bee Wild is the 80/20 tyre designed to handle everyday journeys with agility, comfort and confidence across a wide range of surfaces.

KEY FEATURES:

- 80/20 tread pattern with optimized knobs – Traction and support on paved and unpaved surfaces, with excellent grip on cobblestones, paving stones and deteriorated asphalt.
- Optimized profile – Increased agility during direction changes and manoeuvres, with consistent handling at both low and high speeds.
- High-strength synthetic fibre construction – Enhanced stability and load-carrying capability, providing greater confidence during daily commuting and longer rides.
- Balanced high-silica compound – Improved grip on cold and wet asphalt, delivering consistent performance across a variety of riding conditions.

Description and Sizes

RIM	SIZE	WHEEL
12	120/70 - 12 51S TL M+S	F+R
	120/80 - 12 65P TL M+S	F+R
	130/70 - 12 62S REINF TL M+S	F+R
	130/80 - 12 69P TL M+S	REAR
13	110/70 - 13 48S TL M+S	F+R
	130/60 - 13 60P REINF TL M+S	F+R
	130/70 - 13 63P REINF TL M+S	REAR
	140/70 - 13 61P TL M+S	REAR
	150/70 - 13 66S TL M+S	REAR
14	110/80 - 14 58S TL M+S	F+R
	120/80 - 14 58S TL M+S	F+R
	140/70 - 14 68S REINF TL M+S	REAR
	150/70 - 14 66S TL M+S	REAR
15	120/70 - 15 56S TL M+S	FRONT
16	120/70 - 16 57S TL M+S	FRONT
