

LOCATION

*500km on the roads of north-west Italy on
different types of road*

TEST VEHICLE

BMW R1300 GS

PERIOD

April 2025

THE TEST

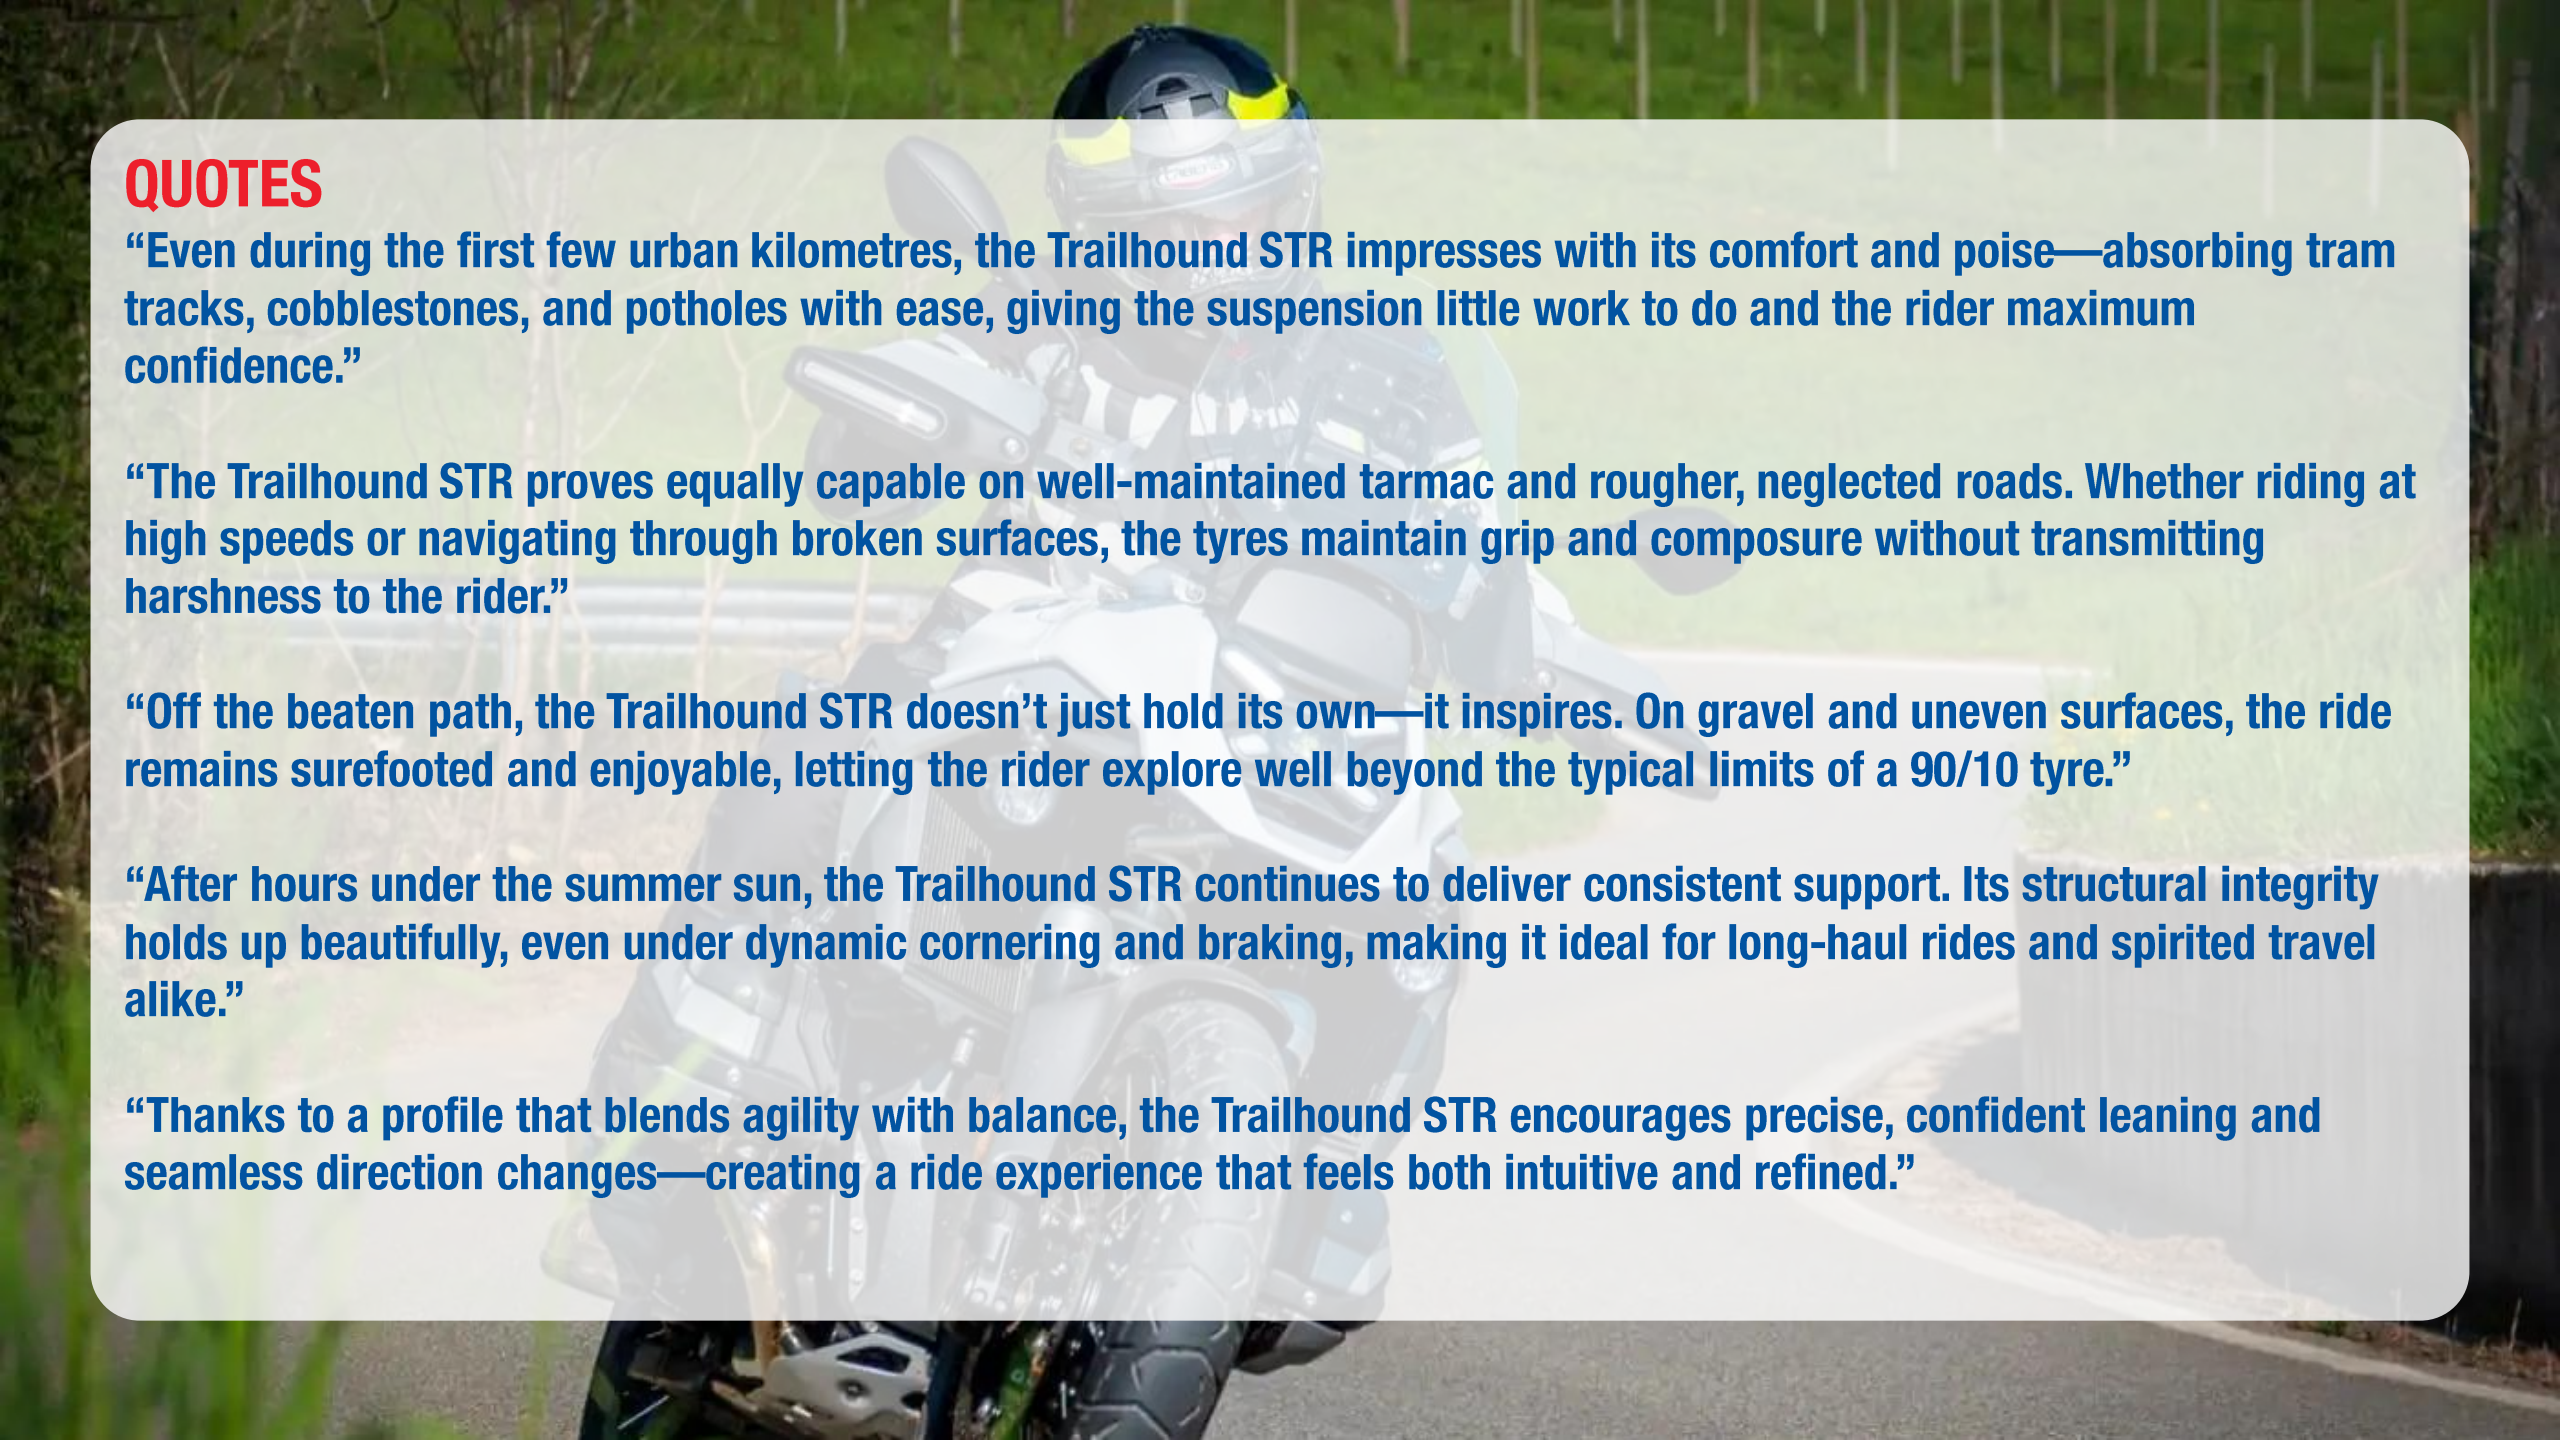

The Eurogrip Trailhound STR test was conducted by the editorial team of RoadBook, a well-established Italian motorcycle magazine renowned for in-depth reviews and expert testing of adventure and touring bikes and gear.

The test route spanned varied terrains in Lombardy and Piedmont, including urban streets, secondary roads, light off-road trails, and motorway sections.

The chosen bike was a BMW R 1300 GS, an ideal platform to evaluate the tyre's performance across both paved and off-road conditions.

KEY RESULTS

- ⇒ **COMFORT AND QUIETNESS:** The tyres effectively smooth out road imperfections (like cobblestones, potholes, and patches) and run quietly, enhancing overall ride comfort
- ⇒ **GRIP AND STABILITY:** Excellent dry grip, even on uneven or damaged tarmac. High stability is maintained in corners and during braking
- ⇒ **VERSATILITY:** Strong performance on gravel roads and light off-road conditions, with consistent traction and precise handling
- ⇒ **HANDLING:** Responsive in direction changes, with a smooth and predictable lean, offering a confident riding feel

QUOTES

“Even during the first few urban kilometres, the Trailhound STR impresses with its comfort and poise—absorbing tram tracks, cobblestones, and potholes with ease, giving the suspension little work to do and the rider maximum confidence.”

“The Trailhound STR proves equally capable on well-maintained tarmac and rougher, neglected roads. Whether riding at high speeds or navigating through broken surfaces, the tyres maintain grip and composure without transmitting harshness to the rider.”

“Off the beaten path, the Trailhound STR doesn’t just hold its own—it inspires. On gravel and uneven surfaces, the ride remains surefooted and enjoyable, letting the rider explore well beyond the typical limits of a 90/10 tyre.”

“After hours under the summer sun, the Trailhound STR continues to deliver consistent support. Its structural integrity holds up beautifully, even under dynamic cornering and braking, making it ideal for long-haul rides and spirited travel alike.”

“Thanks to a profile that blends agility with balance, the Trailhound STR encourages precise, confident leaning and seamless direction changes—creating a ride experience that feels both intuitive and refined.”

ABOUT TRAILHOUND STR

FOLLOW THE TRAIL AND MAKE IT YOUR OWN – A 90/10 road/trail tyre built for long-distance asphalt travel with the freedom to venture confidently onto gravel and dirt.

MAIN FEATURES:

- ▀ **Radial structure with 0° steel belt** – Ensures responsive handling and consistent control across speed ranges
- ▀ **Quadrazone multicomponent technology** on selected rear sizes – Distinct compound zones for optimized grip, mileage, and cornering stability
- ▀ **High Silica Compound** – Enhances traction and flexibility in cold or wet road conditions
- ▀ **Adaptive tread design** – Engineered for balanced on-road wear and confident traction on unpaved surfaces
- ▀ **Profile and casing optimization** – Improves rider feedback, line precision and overall comfort on varied terrain
